

# Advantages of SPAYING or NEUTERING your dogs

## **Pet Population Control**

Thousands of stray pets face euthanasia monthly or are suffering on the streets, so please spay your pets and help prevent this problem.

## **Health Benefits**

### **Females**

- ✓ Decreases the risk of mammary tumors (breast cancer)
- ✓ Eliminates the risk of uterine infections (pyometra)
- ✓ Reduces the risk of TVT (Transmissible Venereal Tumour), a sexually transmitted cancer

### **Males**

- ✓ Reduces the chances of TVT
- ✓ Eliminates the risk of testicular cancer
- ✓ Markedly reduces the risk of prostate cancer, anal gland cancer

### **Behaviour Benefits**

- ✓ Reduces stress
- ✓ Prevents wandering and roaming in search of females, which can lead to:
  - Road accidents
  - Fighting leading to wounds and infections
  - Spread of diseases such as TVT
- ✓ Eliminates marking of territory by urine spraying and reduces odor
- ✓ reduces interdog aggression

***Sterilization may well extend your pets life span.  
So neuter your dog today!***
