## STRAY FREE SELANGOR THE HUMANE & COMPASSIONATE WAY

## WHAT IS STRAY FREE SELANGOR?

**Stray Free Selangor (SFS) - The Humane And Compassionate Way** is a vision where we see a future of a home for every soul, while treating strays with compassion and tolerance.

-----  
**CATCH-AND-KILL, THE CURRENT METHOD OF CURBING STRAYS IS INEFFECTIVE, INHUMANE AND COSTLY FINANCIALLY AND MORALLY. WHILE ANIMALS ARE CLEARED FROM AN AREA, THUS CREATING A VACUUM, OTHER STRAYS WILL VERY SOON POPULATE THE VACATED AREA AND THE VICIOUS CYCLE CONTINUES.**  
-----

SFS focuses on **Humane Education, High Volume Spay/Neuter, Government lobbying** for humane, effective and sustainable ways to curb stray populations.

### Humane Education

Responsible Pet Ownership (RPO), DogCare Program and CatCare Program to be offered in schools, Universities and residential communities.

### High Volume Spay/Neuter

Municipal Councils, DVS vets, private vets, rescuers and NGOs to collaborate and achieve high spay/neuter rates in communities.

### Government Lobbying

Lobby for community animals, habitat for spayed/neutered non-aggressive strays, mandatory spay/neuter, RPO seminars for dog owners.

A MESSAGE FROM  
DULI YANG MAHA MULIA  
TENGKU PERMAISURI  
SELANGOR, TENGKU  
PERMAISURI NORASHIKIN

I am sure this is a story that all Malaysians can relate to. It is almost impossible not to see stray animals in this country. I grew up with cats. They were not ours but every time we moved, the cats seemed to know that our family members are animal lovers. We ended up feeding strays around our house and eventually these strays stayed. At that time, neutering animals was a foreign idea. Most of the kittens died due to sickness and improper care.

It is not only until recently, about 10 year ago, that the idea of neutering became popular. I began embracing the idea whole-heartedly. I can see the value in neutering to purposefully reduce the stray population, be it for dogs or cats. I have been actively rescuing and neutering cats since then. To date, I have more than 10 stray cats that I had rescued and neutered. They were

My rescued kitten Kelly: before & after

My rescued kitten Maebe: before & after

rescued from the market that I frequented, from the roadside that I passed and even from restaurants that I visited to satisfy my gastronomic cravings. My first intention when rescuing these strays was to neuter and put them up for adoption. However, it had been a hard process on my 2 children. My children ended up loving them and in the end, I caved in to my children's pleas and the strays mostly ended up staying.

It is natural to actually find a bottle of cat and dog kibbles inside my car. I feel that even if I could not save the animals, I could at least provide them with one decent meal. It is very hard to turn a blind eye on these destitute creatures.

I would encourage everyone to welcome the idea of neutering, especially for stray animals, to control the over population. Not only it is a humane and effective way to treat these strays, it is also good for the overall well-being of our nation. Our goal to strive for a developed nation status can only be realised if we treat our strays properly. And right now, the neutering of strays is a good start.

Let's come together to make Stray Free Selangor a reality. Hopefully this campaign will be a platform to spearhead a whole nation campaign of Stray Free Malaysia!
